

Home Food Delivery App

Group 27 members: Wasay Ahmed (wahmed9), Christian Gutierrez (cgutie38), Jordan Nguyen (jtn3), Natalie Reyes (nreyes28)

Project Description

Home Food Delivery is similar to Uber Eats

Instead of serving restaurants, this app is dedicated toward serving home cooked meals to customers.

Cloud Firebase is a NoSQL database. The database stores and syncs data between all three users in real time. Each user type and order type has its own collection where their data is stored.
